

To prevent the further spread of COVID-19 (Request to the residents of Yamaguchi Prefecture)

The number of COVID-19 cases have been increasing nationwide, and that is also true for Yamaguchi Prefecture. Therefore, we ask for your cooperation to prevent the spread of the virus.

◆ Infection prevention measures

- Wear a mask
- Frequently wash and disinfect your hands
- Practice social distancing
- Disinfect shared spaces (door knobs etc.)
- Ventilate

◆ Be careful of the 'Five scenes with higher risk of infection'

- ① Social gatherings with eating and drinking, etc.
- ② A large number of people and eating and drinking for an extended amount of time
- ③ Conversations without a mask
- ④ Communal living in a small space
- ⑤ Change of location

◆ Points to consider for travel between prefectures

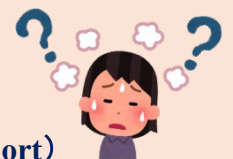

- Please especially avoid all travel that it unessential (going to school, work, and the hospital are considered essential) to prefectures declared a state of emergency or to take semi-emergency (COVID-19) spread prevention measures.
- If you must go, please take thorough infection prevention measures and follow the municipals rules of shortened business hours and restrictions for going out.

>>If you think you have been infected with COVID-19
